

Installation

The easiest way to install and licence is by using the [aescripts + aeplugins manager](#)

To install a trial you can select 'Add Trial' from the 'Account' menu

Then, in AE or Premiere, you will find the plugins in the “BSKL” category in the effects menu.

Use Instructions

To learn how to use the effect, check out the overview video on the product page.

Manual Installation

If you prefer to install the plugin manually:

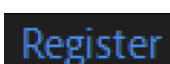

1. Click “TRY” on the aescripts product page (the Trial installer is the same as the registered one)

2. Run the installer in that .zip that corresponds to your operating system.

Manual Registration

Unless you enter your serial number, it will run in TRIAL mode and display a red cross over the output.

To register the plugin manually (without using the aescripts manager), click the Register button on top of the plugin parameters.

You can find your licence code in the 'My Downloads & Licences' section of your user account

on aescrpts+aeplugins. (<https://aescrpts.com/downloadable/customer/products/>).

* Note for Premiere Pro users: register the plugin in AE first. There is no Register button in Premiere, but we are planning to add one soon.
